Meeting number (access code): 731 661 307

Meeting password: exchange

Call to Order and Roll Call

Mary Beth Senkewicz– HBX Staff

Discussion Questions

Leighton Ku, Chair

1. If the market is moving towards offering standard plans only, should the group develop more than one standard plan? The initial development was in the context of a broad array of plan offerings.
 - a. Should HBX require an HSA-compatible standard plan at the bronze and silver levels (and perhaps gold), as well as non-HSA compatible standard plans?
 - b. What should the additional standard be to meet consumer needs?
 - c. At the bronze level, should the standard plan be 62% AV, 65% AV or should there be both?
 - d. What changes should be made to the bronze, silver, and gold standard plans in order to meet the plan year 2018 AV calculator requirements? There will be votes after the 2018 AV calculator is finalized.
2. Should the procedures describing pediatric dental benefits be updated per the attached chart?
3. Should the naming convention “Standard Plan” be changed to Simple Choice or something else?
