**Impact to the 2023 standard plans of including certain services for anxiety in children and adolescents at \$0 cost sharing.**

The impact of eliminating cost sharing for these services, which mainly impacts the “Mental/Behavioral Health and Substance Use Disorder Outpatient Services” category in the AV Calculator, is summarized below.

For Prescription Drugs, the Scenario includes the ~20 NDCs identified in the Whitman-Walker Institute draft scenario.

<b>Plan</b>	<b>Current Metal AV</b>	<b>Anxiety Scenario</b>
Platinum Plan 2023	89.89%	89.91%
Gold Plan 2023	81.92%	81.97%
Silver Plan 2023	71.95%	72.04%
Bronze Copay Plan 2023	64.91%	64.97%

A brief description of how the services were identified, is summarized below:

- Age range
  - Only services for ages 0-18 were included
- Anxiety diagnosis code identification
  - Only claims where one of the previously provided 13 ICD-10 codes is in any the primary, secondary, or tertiary position were included
- Procedure codes to include
  - Only non-inpatient claims where the procedure code and diagnosis code are both in the previously provided lists were included
